DETAILED ACTION

Response to Amendment

Applicant's amendments to the claims filed 09/08/2010 have been entered.

Applicant's amendment to the specification filed 01/04/2006 has been entered.

Crystal form B of (6R)-L-erythro-tetrahydrobiopterin dihydrochloride is defined in applicant's specification by the polymorphic structure that exhibits an X-Ray powder diffraction pattern with the characteristic peaks recited on page 4 lines 20-25.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 49-55 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 7,566,462 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because US patent 7,566,462 claims a tablet which comprises ascorbic acid and polymorph crystal form B of (6R)-L-erythro-tetrahydrobiopterin dihydrochloride in amounts of 100 mg. The primary difference between the two applications is US 7,566,462 does not claim the specific amount of ascorbic acid and the patent while claiming sodium stearyl fumarate, dibasic calcium phosphate and crospovidone does not claim D-mannitol and riboflavin as required in claims 53 and 54. However from the specification of US 7,566,462, specifically example 3 and table 3, the amount of ascorbic acid and the addition of D-mannitol and riboflavin were exemplified in the tablet formulation and therefore would have been obvious to include in the claimed tablet.
